

High performance series

Controller S-HP-E

For discrete dosage and continuous delivery

- Pump controller for discrete dosage and continuous delivery
- Compact housing
- 4-Q-DC servo amplifier
- Digital encoder regulator
- 2 analog inputs ± 10 V
- 10 digital inputs, opto-decoupled
- 5 digital outputs, open collector
- Two colored LED status indicator
- Cable set for mzs-pumps
- EEPROM memory
- RS-232, CANopen interface

The controller S-HP-E is recommended for high requirements in control of discrete dosage and continuous delivery tasks in combination with mzs-pumps mzs-7208 and mzs-11508.

The microcontroller allows speed and position control for highly accurate dosage. The compact design offers flexible installation. Process control link can be established via a RS-232 or

CANopen interface. Motor speed or flow rate can be set either by analog inputs (± 10 V). Programs for dosage control can be saved in the memory.

Technical data

Control	PI-controller, speed and position control
Supply voltage	48 V DC (20 – 55 V)
Backup supply voltage for logic	24 V DC
Max. power output	720 W
Max. continuous output current	10 A
Max. peak output current	20 A (< 1 s)
Speed	1 – 6000 rpm
Voltage connector	header and plug, 5-pole
Pump connector	SUB-D plug, 15-pole; header and plug 5-pole
Analog inputs for motor speed	2, voltage signal ± 10 V
Digital inputs	10, opto-decoupled, high (12 ... 24 V)
Digital outputs	5, open collector max. 24 V / 15 mA
Interface	RS-232, CANopen (DSP 301, DSP 402)
Program memory	2 KB
Operating temperature range	0 ... +40 °C (32 ... 104 °F)
Protective class	IP 20
Mounting method	along the side or along the back
Dimensions (L x W x H)	approx. 150 x 105 x 25,4 mm
Weight	approx. 640 g

Subject to technical changes.

Wiring diagram

Software

All motor parameters for pump control can be set and saved with the software »Elmo Composer« operating under Windows®. The program language is ASCII-based. Dosage programs can easily be typed on a computer and transferred to the EEPROM.

Several sample programs are supplied such as the triggering of different dosage programs with the internal digital inputs.
